

Tell Us

What You Need

Our customers come in all different shapes and sizes, each with a unique set of circumstances surrounding their need for an EasyPivot lift.

Sometimes it's a size or weight consideration, in other cases it's age, condition or housing logistics. Fax us a description of your specific problem and we'll design a solution.

We pride ourselves in responsive engineering to meet your special needs.

EasyPivot™ Lift

by Rand-Scot, Inc.

Which
EasyPivot™
is right
for you?

Necessity

Is the Mother of Invention

In 1973, an automobile accident left mechanical engineer Joel Lerich a quadriplegic. After months of rehabilitation Joel mastered most daily tasks. One task, however, proved to be a menacing obstacle: transferring from place to place. Joel never felt quite safe or stable in a traditional sling lift or on a sliding board. He also became concerned about the long term effects of lifting on his wife's health.

There had to be a better way.

Drawing on his mechanical engineering experience, Joel found that better way and the EasyPivot lift was born: a streamlined machine for safe, efficient transfers that contributes to the health of both the patient and caregiver.

EasyPivot gives you Health & Safety

One of the most difficult challenges of limited mobility is health and hygiene maintenance. With EasyPivot, daily routine skin checks are quick and simple, clothing removal isn't awkward, stretching is easy and secure, use of commode and transfer to bed is fast and comfortable.

In a hospital setting, there may be as many as three people available to help with transfers. This is simply not realistic once a patient moves home—yet thousands of people put themselves and their caregivers in danger several times daily by improper manual lifting or inadequate use of slings or boards.

With EasyPivot, neither the size, strength and agility of the caregiver or patient are a factor in smooth, successful lifts.

Travel

with your EasyPivot

Travel is made easy...

EasyPivot travel bags are sewed of extra heavy ballistic nylon...the same material used in some bulletproof vests. Each travel bag has a built in wheel dolly and handle for rolling transport. Certain models contain a travel leg set necessary to replace the existing legs of the EasyPivot so that they fit into the bag.

Why EasyPivot?

Model EP-81

For Children

The EP-81 is specifically designed to fit children and small adults. It has a downsized chestpad, smaller linkage to fit short torsos, and an optional elevating footbase for short legs. The EP-81 can be retrofitted with EP-82 parts as the user grows. *Capacities below are approximate as they are based on patient proportions*

Capacity: 180 lbs. with footbase 3'4" - 4'6" w/o footbase 4'6" - 5'8"	Frame Warranty: 2 Yr. Wheels: fits through 26" opening
Machine Wt.: 70 lbs.	

Model EP-82

For Homecare Economy

The EP-82 is our lightweight home care unit. Like the EP-110, it has a center column for exceptional balance, total lock wheels and dual handles. The EP-82 upholstery is molded, urethane rubber. This model adjusts to fit through 24" doorways.

Capacity: 225 lbs./6'2"	Frame Warranty: 2 Yr.
Machine Wt.: 70 lbs.	Wheels: fits through 24" opening

Model EP-110

For Deluxe Homecare

Our most durable and comfortable home care unit, the EP-110 is a third generation design. The center column approach offers dual kneepads for better stance and a deep base to fit nearly all wheelchairs. The EP-110 has sewn vinyl upholstery, total lock 4" wheels, and dual handles for strain-free lifting.

Capacity: 330 lbs./6'7"	Frame Warranty: 2 Yr.
Machine Wt.: 94 lbs.	Wheels: fits through 26" opening

Model EP-255

For Lifting a Variety of Patients

This lift is the perfect choice for schools, hospitals and rehabilitation centers. A jack screw in the center column makes adjustment from patient to patient quick and easy. The EP-255 features high quality upholstery as well as a multi-loop thigh strap, ball bearing wheels (easy for carpet) and total-lock brakes.

Capacity: 280 lbs./6'6"	Frame Warranty: 2 Yr.
Machine Wt.: 94 lbs.	Wheels: fits through 27" opening

Model EP-325

For a Wide Range of Circumstances

The EP-325 is truly a chameleon. This versatile lift is the best option for those institutions needing to accommodate a constantly changing set of variables when lifting. It works equally well for different wheelchair widths, above average weight or height, and even narrow halls and doors. Features include enhanced frame, variable wheel base and adjustable height footbase.

Capacity: 380 lbs./6'6"	Frame Warranty: 2 Yr.
Machine Wt.: 145 lbs.	Wheels: fits through 27 1/2" opening

Which Model is for Me?

The EP-81 is shown here with optional adjustable foot base. The EasyPivot lift works best with kids of lower tone.

Transferring in the EasyPivot is a natural, comfortable progression of movements and positions.

Comfort & Versatility
