

## STAIRLIFTS

Butler™ Stairlifts deliver  
improved quality of life

## Optimize your quality of life with complete independence at home

Butler™ Stairlifts offer you the independence and freedom to fully enjoy your own home. Easy mobility around the home is nothing more than you deserve and can be yours at a surprisingly affordable price with a safe, reliable and unobtrusive stairlift from Butler Mobility Products.

Butler Stairlifts have been wholly manufactured in the USA by The Flinchbaugh Company for more than four decades. Thousands of customers have enjoyed the smooth and safe operation, dependable service, and affordability that Butler Stairlifts offer over other brands.

Our stairlifts are designed with simple moving parts that are wear-resistant for maximum dependability over many years. Customers have the choice of two models. The Imperial Elite features our proven screw drive technology, which eliminates chains and cables. The Breeze uses our advanced belt drive engineering, which replaces obsolete rack and pinion drive systems, offering unsurpassed smooth and quiet operation.

## Butler's range of stairlifts

### Imperial Elite Stairlift

Butler's Imperial Elite Stairlift has been delivering freedom and satisfaction to customers for more than four decades. The Imperial Elite uses screw drive technology and an AC motor – ensuring reliability, low maintenance and safety that exceeds government regulations.

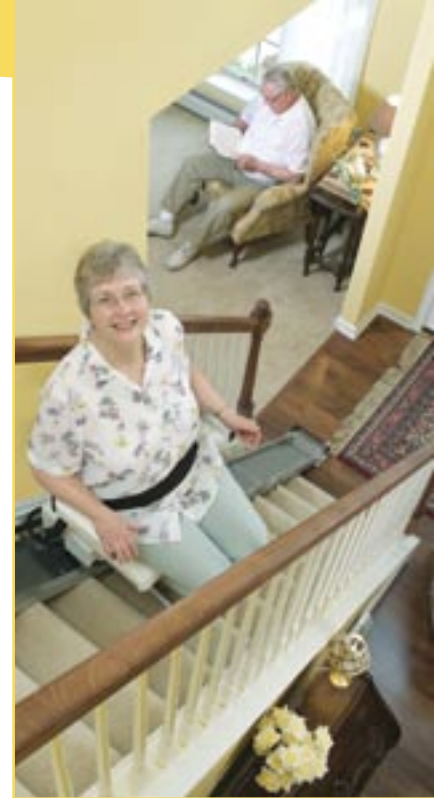

### The Breeze Stairlift

Butler's new stairlift model, called The Breeze, offers the same benefit of independence in your home, with the enhancement of belt drive technology. The Breeze runs on a DC motor with battery back-up and delivers an unsurpassed smooth and quiet ride, while still providing the same great safety, reliability and low maintenance.

## Operational safety

Throughout four decades of manufacture, the Butler Mobility product line has maintained an excellent record of safety. Butler Stairlifts meet or exceed all requirements of the Government's National Safety Code for Private Residence and Public Building Incline Lifts.

A specially-designed cut-off safety switch renders our stairlift inoperative and indicates that service is necessary. All controls are safely within reach and easy to operate. Ergonomic design of the seat and footrest also contribute to operational safety, along with seat arms and a lap-positioned restraint belt.

## Improved quality of life

Thousands of customers have enjoyed the smooth and safe operation, dependable service, and affordability that Butler Stairlifts offer.

## Comfort and convenience

Butler Stairlifts are fully adjustable to provide complete ergonomic comfort and safe operation at all times. The seat height and position of the foot rest are designed for easy access and ride comfort.

The seat itself is upholstered with generously padded material, which also absorbs sound to reduce noise and vibration from the motor. And when not in use, the seat and footrest fold so the entire unit takes up only 14 inches of stair width.

A foot-operated call button is conveniently located at the top and bottom of the unit, so the stairlift can be accessed in all circumstances and can be used by more than one person.

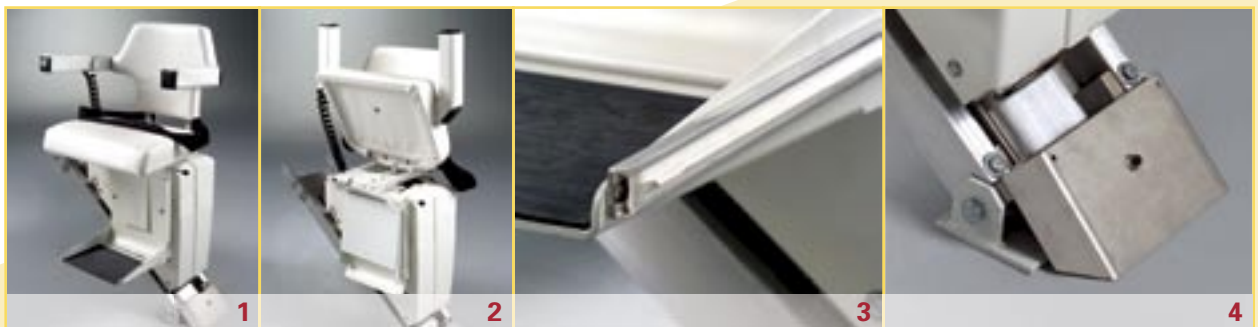

## Quality, installation and service

Butler Stairlifts have been designed and built with the same emphasis on quality by The Flinchbaugh Company since 1968. Units feature only three rotating parts, which are wear-resistant and rated to support loads in excess of 300 lbs.

Butler's unique safety nut on the Imperial Elite is suspended to float freely, eliminating any wear. It is design features like these that have given Butler the reputation for dependability and low maintenance over a long product life.

Butler's range of Stairlifts is designed to install quickly and easily on a wide variety of stair configurations. These can vary in length, steepness and direction. The units are also interchangeable between left and right side installation, which is a consideration for potential resale value.

Butler Mobility Products provides a five-year limited manufacturer's warranty and nationwide customer service and maintenance either direct with Butler or through a network of authorized distributor / installers.

- 1** Butler stairlifts offer full adjustment for ergonomic comfort and safe operation at all times.
- 2** When not in use, the seat and footrest fold to take up only 14 inches of stair width.
- 3** A pressure-sensitive safety switch shuts down Butler Stairlifts in the event of an obstruction.
- 4** The Breeze uses advanced belt drive engineering for an unsurpassed smooth and quiet ride.
